

SystemSafe Zero

Product Code : BZE001 / BZE002

Introducing SystemSafe Zero, the ultimate solution for protecting domestic central heating systems. This combined antifreeze and inhibitor product not only prevents internal corrosion and limescale formation, but also extends system life and maintains energy efficiency.

With its non-toxic, environmentally friendly formulation, it's compatible with all metals and materials commonly used in heating systems, including aluminium. Ensuring long-term protection and prevention of pipework freezing with this 5 and 20 litre liquid product.

Don't miss out on the opportunity to safeguard your heating system and maintain its peak performance.

Product Features

- Combined anti-freeze and inhibitor for use with all metals across heating, solar and ground source systems.
- Effective frost protection, limescale and corrosion control.
- Dosage and dilution rate at a minimum 25% at freezing point -11°C.
- To be used in accordance with BS7593. Low toxicity and non-volatile.
- Compatible with Kamco products within range.
- NSF CIAS certified.

Product Specification

Concentration : 25, 33, 40, 50%

Protection : -11, -16, -22, -32°C

PH (Conc) : 8.2 (7.5-8.5)

Form : liquid

Odour : mild, aromatic

Maximum Temperature : 150°C

EAN / Barcode : 5L - 506013459 1718 - BZE001

EAN / Barcode : 20L - 506013459 1701 - BZE002

'safeguard against frost and burst pipes'

When you choose Kamco chemicals, you're selecting a trusted manufacturer with over 40 years of expertise in delivering effective solutions for power flushing and descaling across diverse global markets. Experience matters, and with Kamco, you're in good hands.
