

SystemSafe KS4 Central Heating Leak Sealer

The new SystemSafe KS4 Central Heating Leak Sealer is a specialised product designed to seal minor leaks and imperfections within central heating systems. It is an effective solution for addressing small leaks in pipes, radiators, and joints without the need for costly and disruptive repairs.

The leak sealer is particularly useful for maintaining system integrity and preventing water loss, improving the overall efficiency and longevity of the system

Product Features

- **Seals minor leaks** which are typically caused by corrosion, stress or wear and tear.
- **Prevents water loss** by effectively sealing leaks, reducing the risk of pressure drops and water wastage.
- **Safe for all systems** including all types of central heating systems.
- **Quick and simple fix** which saves time and money by offering a quick and effective solution.
- **Non-invasive** so no need to dismantle parts of the system or undertake disruptive repairs.

Product Specification

Sizes Available : 500ml
Dosage : 500ml per 100-litre system
Form : Mobile emulsion
Odour : Slight odour
Colour : Off white
pH Conc : 7.0-8.0
SG : 1.00
Product Code : 500ml - BSS005
EAN Number : 500ml - 5060 13459 6050
