

## SystemSafe KS7 Central Heating Biocide

The new SystemSafe KS7 Kamco Central Heating Biocide is used to prevent the growth of harmful bacteria, algae, and fungi in central heating systems.

It is used to maintain the efficiency and cleanliness of the system, as microbial growth can cause blockages, corrosion, and other issues that reduce the performance and lifespan.

It is specifically formulated to break down and remove a wide range of contaminants such as sludge, limescale, rust, and corrosion deposits, which can impair the performance of the heating system.

Prevent Biofilm formation which is a slimy layer that forms on surfaces in contact with water.

## Product Features

- **Prevents and treats biological growth** by combatting bacteria, algae and other contaminants in systems.
- **Improves system efficiency** by preventing the growth of bacteria and algae.
- **Control of biofilming** which prevents the build-up of biofilms which can impede heat transfer and create breeding grounds.
- **Non-oxidising formula** unlike oxidising biocides like chlorine or bromine.
- **Suitable for all** multi metal systems and LTHW systems.

### Competitor Comparisons

- Adey MC10+
- Fernox F7
- Scalemaster SM7
- Sentinel X700

## Product Specification

**Sizes Available :** 500ml & 10L

**Dosage :** 500ml per 100-litre system

**Form :** Liquid

**Odour :** Slight

**Colour :** Light yellow

**pH Conc :** 3.0-5.0

**SG :** 1.02

**UFI :** 4120-G081-700U-XJCR

**Product Code :** 500ml - BSB001

10L - BSB003

**EAN Number :** 500ml - 5060 13459 1909

10L - 5060 13459 1923

**BUILT IN  
BRITAIN** 

+44 1727 875020
